

Restrictions due to Coronavirus spreading

Consultations Restrictions

Only patient him/herself can wait inside the building.

*Please inform the staff if you are necessary to accompany your child.

*When the patient him/herself is a minor, one adult can be accompanied.

After the Lifting of the State of Emergency

Those who wish to attend birth and visit after birth, please present a vaccination certificate at the reception in advance.

*If you cannot bring a certificate, the copies of your vaccination questionnaire with your name and the vaccination dates on are also available.

- **Vaccination certificates must be presented in advance** for both patient and her partner. You must finish your second shot by one week before the time of your delivery. (Exceptions: If the partner are vaccinated twice BUT the patient herself was unable to get her second shot by the time of delivery, birth attendance and visits are available.)
- Attending birth inside the delivery room is available from right before the baby is born until 30 minutes after delivery. (Staff will inform when the partner can enter the room.)
- **[Private room users only]** One partner can visit after delivery during the stay, up to 30 minutes each day. Visiting hours are 10:00 - 17:00. (**No kids allowed.**)

***Those who are not vaccinated can have their husband/partner visit inside the delivery room for 30 minutes AFTER the baby is born. No birth attendance or visits available.**

*If the partner is sick or have any suspicious symptom, you will not be allowed to attend birth. Also, if you do not present a vaccination certificate at the reception in advance, you will not be allowed to attend birth.

*Partners of C-section patients are not allowed for attending birth as before from medical safety reasons.
